PROJECTS

Resume Builder
Developed a user-friendly Resume Builder using Material UI, React Hook Form, and React Router, enabling users to select templates, input details, and download resumes in PDF. This enhances user experience and simplifies professional resume creation.

Flashcard Generator
Developed a flashcard management app using Formik, Redux, and Tailwind CSS, allowing users to create, edit, view, and share educational flashcards with persistent storage via local storage API. Enhances learning by offering flexible flashcard creation, review, and sharing options.

SubTracker
Built a simple web application using Node.js and MongoDB to manage YouTube subscribers, allowing them to create, read, and access their data via specific API endpoints. This streamlines subscriber data management and retrieval.
